

Best General Insurance Platform

paymentshield 

**Paymentshield has earned this award for its
cutting-edge technology**

Paymentshield increased its profits by 68% last year to £11.5m and has recently been recognised as one of the fastest-growing companies in the UK. Many might wonder what the secret is to Paymentshield's success – but, for brokers, its innovative technology is clearly no secret.

Inertia, Paymentshield's quotation software, frees up brokers' valuable time which would otherwise be spent on administration.

At the touch of a button, you can generate quotations for MPPI, buildings & contents insurance and landlords' buildings & contents insurance, as well as eTrade applications direct to Paymentshield underwriters. Inertia also fully integrates with MBL, Trigold, TMOS, Mortgage 2000, 1st Software and Sesame, allowing common customer data to be shared, without forcing brokers to re-key information.

Over the past year, the firm has invested heavily in the support it offers to intermediaries, updating and improving its website, launching an e-conveyancing service and even setting up a broker support team for those rare offline enquiries. This shows a progressive approach to technology that justly deserves the highest praise.

Web address: paymentshield.co.uk
